

NIST Traceable Certification of VRC Vacuum Gauges

All Vacuum Research gauges are carefully calibrated before they are shipped. However, in certain very critical applications your customer or your own Quality or Meteorology department may require written assurance of traceability of calibration. For such situations we can provide a certificate for any of our gauges. Our calibration quality system complies with ANSI/NCSL Z540-1-1994.

All you have to do is contact our customer service department for an "RGA" number and ship your instrument and sensor to us. We'll adjust the zero and full scale of your instrument to agree with our NIST calibration standards. We'll also compare your instrument to these standards throughout the entire range, and certify the actual readings.

This certification can be provided on new instruments or on older instruments whenever you require it. Price is FOB our plant. Shipping costs to and from our plant are not included. Usual time required for certification is seven to 10 days after we receive your instrument.

Ordering Information

Pirani, Convection, or Diaphragm Gauges

Certificates after repair or adjustment only
P/N: 912900 \$260

Certificates for as received plus after repair or adjustment
P/N: 912901 \$419

100 mTorr Pirani Gauges

Certificates after repair or adjustment only
P/N: 912911 \$394

Certificates for as received plus after repair or adjustment
P/N: 912912 \$522

Wide Range Diaphragm Manometers

Certificates after repair or adjustment only
P/N: 912902 \$389

Certificates for as received plus after repair or adjustment
P/N: 912903 \$612

NIST Traceable Vacuum Gauge Calibration Certificate

We certify that the "Calibration Standards" used in this test are traceable to NIST calibration standards, that the data presented below are true and correct and that the instrument tested met all of manufacturer's performance specifications at the time of this test.

Calibration Quality System complies with ANSI/NCSL Z540-1-1994.

This Test performed by: _____ Date _____
 Signature _____ Date _____ John F. Hartnett, President
 Name _____ Vacuum Research Corp.

Customer Name _____ Customer Asset No. _____
 Address _____

VRC Device Being Certified: _____ Date of This Certification _____ SO # _____
 Instrument P/N: _____

Calibration Standard	Device As Received	Device As Calibrated	Limit Allowed		4 to 20 mA Output
			Min.	Max.	
0 mTorr			0	0	
5 mTorr			2	8	
10 mTorr			7	13	
25 mTorr			22	28	
50 mTorr			47	53

Easy To Use, No Electronics Training Needed

These compact and easy to use electronic calibrators allow you to adjust both zero and full scale of any Vacuum Research gauge without the use of a vacuum system, and without any electronics training. Just follow the step by step procedure on the calibrator front panel to insure performance the same as a new gauge.

Making sure that your vacuum gauges are working properly has never been easier. These calibrators do not require any electronics training yet they allow you to adjust your Vacuum Research Gauge exactly to like new factory specification.

The procedure is simple. You begin by unplugging the vacuum gauge sensor cable from the gauge tube and plugging it into the calibrator. After allowing one hour for warm up you adjust the offset on the rear of your gauge to read "000".

You then adjust the "span" to the specified value. Repeat the procedure two or three times until no adjustment is needed and the job is done. Your gauge calibration is now the same as it was when leaving the factory.

After calibrating the electronic portion of your vacuum gauge you may want to install a factory fresh gauge tube. Because the tube is exposed to pump fluid vapors and other dirt from your process it may become contaminated and give erroneous readings. It is good practice to compare on a regular basis the readings with our "working" gauge tube and a brand new tube or one that is known to be clean.

NIST Traceable Certification of Vacuum Gauge Calibrators

All Calibrators are tested to strict standards prior to shipment. In addition to this you need certification of the testing, it is available for new and existing calibrators. For recertification of your existing calibrators, please contact the factory for an "RGA" number, and return the calibrator freight prepaid with your purchase order. Time required for certification is 5 to 7 days.

Certificate of NIST Traceable Calibration both as received and after repair and adjustment

- For Wide Range and Convection Gauge Calibrators
P/N: 912904\$422
- For Pirani, Diaphragm and Thermocouple Gauge Calibrators
P/N: 912905\$215

Certificate of NIST Traceable Calibration after repair or adjustment only

- For Wide Range and Convection Gauge Calibrators
P/N: 912906\$270
- For Pirani, Diaphragm and Thermocouple Gauge Calibrators
P/N: 912907\$137

Ordering Information

- 0.5 - 1200 Torr Manometer Calibrator P/N: 912300 \$485
- Wide Range Manometer Calibrator Kit P/N: 912110\$743

- 912105 Gauge Tube Calibrator..... P/N: 912279..... \$380

- **Verify complete system; sensor and display**
- **Easily confirm vacuum gauge calibration**
- **Satisfy ISO-9000 auditors and inspectors**
- **Choose Manual or Electro-pneumatic actuator**
- **Use with any brand or type of vacuum gauge**

With ever increasing needs to verify vacuum gauge accuracy many gauge manufacturers, including Vacuum Research, now offer electronic calibrators or “reference tubes.” Although such devices are helpful they only deal with the control or display part of the gauge and do nothing to evaluate the sensor. This is unfortunate because in the real world most vacuum gauge errors involve the sensor. Vacuum Research developed these manifolds to make it easy to compare your working gauge with a reference gauge or a certified standard gauge. Burned out filaments and ruptured diaphragms are easy to diagnose but the most typical failure mode of a vacuum gauge is a gradual shift in calibration due to pump fluid and dirt on the sensor. Such changes can be easily detected with these manifolds because the two sensors are only inches apart.

Manifold with Manual Actuator

Manifold with Air Open-Spring Close Actuator

Ordering Information

BUY NOW! Go to www.vacuumresearch.com to order online

Our standard manifolds have 300 series stainless steel bodies and NW-16 ports for sensor and system connection. Other flanges such as NW-25 are available as are compression type quick connects for 1/8 inch NPT, 1/2 inch O.D. and 0.75 inch O.D. All manifolds use a welded bellows stem seal.

NW-16 Calibration Manifold, Manual Actuator Stainless steel manifold body with welded bellows. All 3 ports NW-16.
P/N: 912274 \$518

NW-16 Calibration Manifold, Air Open - Spring Close
Stainless steel manifold body with welded bellows. All 3 ports NW-16. (Solenoid and Position Indicators not included.)
P/N: 912275 \$543

3 Way Solenoid for Air Open-Spring Close Manifold Add suffix to manifold P/N: SOL-120 VAC, SOL-230 VAC or SOL-24 VDC To manifold cost Add \$170

Position Indicators

Air open-spring close manifolds can be equipped with a pair of SPST switches to indicate valve open and closed. These unpowered switches have contacts rated for 1 amp @ 300V, non-inductive. Add the suffix 'PI' to P/N & to price of manifold Add \$144./pair

Additional Port for Roughing

Add an additional NW-16 port for connection of a roughing pump to the reference tube side of the manifold. Add suffix 'RP' to P/N & to price of manifold Add \$134
