

All of our vacuum instruments can be provided with displays and analog outputs reading directly in mbar. To specify a Vacuum Research gauge calibrated in mbar simply add the suffix "mbar" to any of our gauge p/n's. There's no extra cost and all specifications other than the unit of measure are the same as those shown in this catalog for our gauges calibrated in Torr. The transducers and gauge tubes used with Torr and mbar instruments are identical and do not require any suffix.
